EXECUTIVE SUMMARY

Full-stack engineer with strengths in React, Angular, Vue, Node.js, Laravel, SQL, and NoSQL. Capable of delivering highly responsive, modular front-ends and efficient, well-documented RESTful API backends.

COMPUTING EDUCATION

Rochester Institute of Technology, College of Computing and Information Sciences

Rochester, NY

Bachelor of Science, Game Design and Development

August 2021 - May 2025

- Relevant Coursework: Rich Media Web Application Development II (React/Node.js/MongoDB/Redis), Experience Design Games and Media (UI/UX), Data Structures and Algorithms for Games and Simulations II (C#), Foundation of Game Graphics Programming (C++)

TECHNICAL SKILLS

Programming | JavaScript/TypeScript, Laravel, React.js, PHP, Vue.js, Node.js, Angular, Express, Java, C#, C++, Redis

Tools | GitHub, WordPress, Amazon Web Services, MySQL, Jira, Visual Studio Code, ServiceNow, Adobe Suite

WORK EXPERIENCE

Golisano College of Computing and Information Sciences

Rochester, NY

Full Stack Engineer

Jan 2025 – May 2025

- Developed a full-stack web application using React, SQL, and RESTful API integrations, supporting approximately 10,000 active users and improving access to student-led projects.
- Implemented front-end design tokens, enhancing UI consistency and maintainability while working in an Agile development team of five.
- Built and optimized key UI components including dashboards, profile interfaces, project listings, and settings.

Rochester Institute of Technology ITS

Rochester, NY

Service Desk Representative

Oct 2022 – Dec 2024

- Diagnosed software, hardware, and network issues using established processes, enabling faster resolution times and more efficient service operations.
- Documented incidents in ServiceNow and maintained a structured Knowledge Base to streamline repeat issue resolution and support team knowledge-sharing.

Pascack Valley Regional High School District

Montvale, NJ

Information Technology Summer Intern

Jun 2019 – Aug 2021

- Maintained essential IT infrastructure including network closets, laptops, projectors, phones, and Apple TVs to ensure uninterrupted daily operations.
- Assisted in front-end development of the district's alumni registry, improving interface usability and system organization.

PROJECT EXPERIENCE

Laravel Demo | *Personal Project*

Feb 2026

- A CRUD web application developed in two days using React.js, Laravel, and MySQL to demonstrate competency in the tech stack used by EarthCam for the JR. Backend Developer position. Includes a basic authentication system, the ability to create, read, update, and delete comments, and query filtering through front end input.
- Hosted temporarily via Heroku at <https://earth-cam-laravel-demo-41144387b202.herokuapp.com/>

Ignite-Boost.net Revamp | *Personal Project*

Jun 2025 – Aug 2025

- Recreated the web application ignite-boost.net, serving as a replay database for the fighting game Dengeki Bunko Fighting Climax. Provides a basic authentication system and the ability to add and view video replays.
- Redesigned the front-end from the ground up using Angular, Angular Material, and TailwindCSS, while updating the backend with MongoDB.

EXTRACURRICULAR EXPERIENCE

RIT Fighting Game Club

Rochester, NY

President

May 2023 – Dec 2024

- Organized and ran weekly double-elimination tournaments for fighting games, engaging 30+ club members per session and fostering a competitive, inclusive community.
- Managed budget and fundraising for new equipment, allocating funds efficiently to enhance club resources and member experience.
- Developed and maintained the club's website with Bootstrap and AWS, integrating the Challonge API to track bracket performance and display sortable tournament results stored in a SQL database.

FRC Team 1676: The Pascack Pi-oneers

Montvale, NJ

Information Technology Subdivision

Sep 2017 – Jun 2021

- Led IT subdivision during the 2020-2021 season, overseeing the migration of the team website from Drupal to WordPress, improving usability and accessibility for team members.
- Contributed to the development of the scouting web application, building a PHP back-end with SQL database integration to track and analyze competition data for strategic alliance formation.
- Developed a Google Calendar-integrated page for "Awning", a scrapped stress management application, allowing users to manage events that synced directly with Google Calendar.
